

Please complete **Table A** every time you spade your stand. **Tables B, C** and **D** only need to be filled in the first time you spade your stand each year.

Table A. General Information

Team Name	
Team Members	
Date	
Stand Location - Block number (see stand information sheet)	
Stand Location - Latitude* (see stand information sheet)	
Stand Location - Longitude* (see stand information sheet)	
Spade number (this year)	1 2 3
Year stand was first cut	
Number of years stand has been cut	
Photo of stand taken before removal? (yes/no)	
Photo of stand taken after removal? (yes/no)	

*In decimal degrees

Table B. Stand Size Estimate

Stand area estimate before measuring (see stand information sheet) (m ²)	
Measured stand length (m)	
Measured stand width (m)	
Estimated stand area based on measured length and width (m ²) (measured length multiplied by measured width; answer rounded to two decimal places) **	

**See Appendix 1 in the Protocol Document for an example of how to make this calculation

Table C. Stem Tally

Tally of stems removed	
Total number of stems removed (sum of tally)	

Table D. Estimated Stand Density

Total number of stems removed	
Estimated stand area based on measured length and width (m ²)	
Estimated stand density (total number of stems removed divided by the approximate area of the stand; answer rounded to two decimal places) (stems/m ²) ***	

***See Appendix 2 in the Protocol Document for an example of how to make this calculation
